## Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## Status

- 1) ☐ Responsive to communication(s) filed on 13 May 2004.
- 2a) ☒ This action is **FINAL**. 2b) ☐ This action is non-final.

## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim 18 is rejected under 35 U.S.C. 102(b) as being anticipated by Thomas (US patent 3,612,744).

Thomas' device discloses a cable system comprising a cable having a conductor, a power layer (61, 62, 63) overlapping strip or conductive layers; rectangular grooves or recesses (see fig. 6); the power layer being formed of a conductive material and having a first region and an adjacent second region, the first region including a greater amount of the conductive material than the second region such that the power layer is less resistant to bending along the second region than along the first region (see claim 1); the cable having a longitudinal axis, the second region defining an axial bending about which the power layer is less resistant to bending (see fig. 3).

### ***Response to Amendment/Argument***

Applicant's arguments filed with the amendment/argument on 5/13/2004 have been fully considered but they are not persuasive. The claims do not define structural structure features that distinguish over prior art: For example, Thomas' device discloses a cable system comprising a cable having a conductor, a power layer (61, 62, 63)

Art Unit: 2839

overlapping strip or conductive layers; rectangular grooves or recesses (see fig. 6): see the rejection above. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.

### ***Conclusion***

Claims 2, 4, 6-8, 10-15, and 21 are allowed over prior art of record. The amendment/argument filed on 5/13/2004 partially overcomes the rejection (see page 8, lines 5-16; page 9, lines 11-14; and page 10, lines 12-15).
